

# Roland Mackintosh

City: [redacted] || phone: [redacted, as it is posted online]

Website: <http://www.rolandmackintosh.ca> || email: [rolandmackintosh@outlook.com](mailto:rolandmackintosh@outlook.com)

All projects visible on my GitHub: <https://github.com/plutownium>

## Portfolio Projects

- ASCII Dijkstra's Algorithm Visualizer: Does what the title says. Built using HTML, CSS, JavaScript.  
Link: <https://plutownium.github.io/ASCII-Pathfinding-Visualizer/>
- Sales Funnel Builder: A ClickFunnels knockoff I wrote using React.  
Link: <https://salespages.netlify.app/>
- Roland's Awesome Wallpapers: A web design project I built using JavaScript and Reddit's API.  
Link: <https://plutownium.github.io/Reddit-Wallpapers-App/>

## Previous Coding Experience

- Two years of Python
- One year of JavaScript and React
- One year of HTML and CSS
- One year of MongoDB and MySQL

## Work Experience

### **Stockk.io – Frontend Engineer (2020)**

- Helped Stockk convert JSON to a table of data for users to look at.
- Referenced and repurposed CSS wrote by other engineers.
- Provided an (accurate!) estimate of how much time the project would take to complete.
- Received praise from the CEO while working on the project.

## Soft Skills

- 10/10 written communicator. My writing has been retweeted by New York Times bestselling author Scott Adams. He wouldn't do that if the writing wasn't excellent.
- 7/10 verbal communicator. I did hundreds of hours of sales demonstrations in my work as a salesman.
- Team player. I like working with competent people.
- Highly coachable. A senior LinkedIn engineer helped me for a month while I learned programming. I was coachable – his help wasn't wasted.
